

Objective

Motivated 4th-year Software Engineering student seeking an internship opportunity to gain practical industry experience by applying strong foundations in software engineering and full-stack web development. Eager to contribute to real-world projects, collaborate with experienced engineers, and further enhance skills in modern web technologies, cloud platforms, and scalable system design.

Experiences

HUCISA (Haramaya University Computing and Informatics Students' Association)

Project Team Head

June 2024 – Oct 2025

- Led and coordinated a project team by planning schedules, assigning tasks, and ensuring timely completion of activities
- Supported team members through effective communication, guidance, and problem-solving to maintain productivity
- Organized and helped manage community-focused events to promote student engagement, awareness, and participation
- Collaborated with local organizations and university stakeholders to strengthen outreach efforts and resource availability

Projects

Modern E-Commerce Fashion Store | [Link](#) | [Github](#) | TypeScript, Express.js, Node.js, PostgreSQL, Firebase,

- Built a full-featured e-commerce platform with admin dashboard and role-based access control. Integrated Stripe for secure payments and SendGrid for email notifications
- Implemented product, order, and user management with real-time Firestore database updates

Charity Donation Platform | [Link](#) | [Github](#) | TypeScript, React, Express.js, Node.js, PostgreSQL

- A charity donation management system with donor dashboards, campaign tracking, and admin analytics
- Integrated multiple payment gateways, responsive UI, and content management for Islamic inspiration and charity info

Movie Recommendation System | [Github](#) | JavaScript, React, Tailwind CSS, Flask, Python, Scikit-learn

- A modern web application that provides personalized movie recommendations using machine learning algorithms
- Features: Personalized movie recommendations, user authentication (login/register), watchlist management, movie search and filtering, responsive design with dark/light themes

Ethiopian University Placement Tracker | [Link](#) | [GitHub](#) | React.js, JavaScript, MySQL, PHP, Tailwind CSS

- Developed a web application to help Ethiopian students track university placement results in real-time.
- Features for students: placement status check, university search, personal dashboard, profile management

Features for administrators: student management, placement data upload via CSV, secure admin panel with role-based access.

Skills

- Programming Languages:** JavaScript | Typescript | Python | PHP | Java | HTML | CSS | C++
- Frameworks:** Express.js | Node.js | React.js | Next.js | Tailwind CSS | Flutter
- Technologies:** Git | GitHub | Firebase | Supabase | MySQL | PostgreSQL | MongoDB | GraphQL | Docker
- Soft Skills:** Growth Mindset | Adaptability | Teamwork | Collaboration | Communication | Project Management

Education

Haramaya University | HU

June 2022–Present

BSc in Software Engineering | CGPA: 3.87/4.0

Haramaya, Ethiopia

- Relevant Coursework: Calculus, Data Structures and Algorithms, Distributed Systems, OOP, Database Systems, Operating Systems, Computer Architecture and Organisation, Machine Learning, Probability and Statistics, Discrete Mathematics, Enterprise Application Development, Networking, Web and Mobile Development
